Extract from the Staff Meeting Minutes of 28 April 1980:

Hetu called attention to a 27 April New York Times article (attached) by Richard Burt "Officials Describe Painsstaking Plan of Military and Agents Sent to Iran." Hetu noted particularly Burt's continuing access to Administration officials on sensitive matters and his ability to gather related details. Noting the need to develop a damage assessment, the Director asked Hetu to gather information and/or copies of captured classified photos, maps, and other documents displayed publicly by Iranian militants as a result of the aborted rescue operation.
